WARNING

Before playing this game, read the Xbox 360 Instruction Manual and any peripheral manuals for important safety and health information. Keep all manuals for future reference. For replacement manuals, see www.xbox.com/support or call Xbox Customer Support (see inside of back cover).

IMPORTANT HEALTH WARNING ABOUT PLAYING VIDEO GAMES

Photosensitive Seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by taking the following precautions:

• Sit farther from the television screen.
• Use a smaller television screen.
• Play in a well-lit room.
• Do not play when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.
WELCOME TO MY WORLD!

Let me begin by saying that you have made a wise choice in adopting our cutting-edge home version of the legendary DeathMatch software. Though there are many pretenders in the world, none has—or will—come close to threatening the market share or enduring popularity of the phenomenon that is DeathMatch, and certainly dataDyne is the only company capable of replicating the technology in a form deemed suitable for private and personal use.

Thanks to our ingenuity, now you too can aspire to the great feats of athleticism, stamina and nerve displayed by some of the world’s top DeathMatch combatants. Maybe one day you will even join them out there on the international stage, adored by millions, competing for glory and the simple visceral thrill of the takedown.

I am confident that, in the days ahead, our DeathMatch software will record many glorious victories on your behalf, and I hope that from this domination you derive great wisdom and even greater ambitions.

Thank you for choosing dataDyne. Your decision pleases me.

- Zhang Li, dataDyne CEO

When you first venture into the game world, you will be asked to create a profile. Your profile keeps track of your progress in the game and records details of your scores, settings and game achievements. Progress is automatically saved to your profile after each level and also when you achieve something new or change your settings.

You only have to create a profile once. It will then be loaded automatically every time you play.

MAIN MENU

The following options are available from the Main Menu.

1. MISSIONS
   Run the full gauntlet of story-based missions in either Solo Agent or Co-Operative mode.

2. COMBAT ARENA
   Set up a multiplayer game (split-screen play, System Link or Xbox Live). See the Combat Arena section for full details.

3. OPTIONS
   Optimize your control setup, change the default multiplayer character and edit audio/video options.
You can tackle the missions as a single player in **Solo Agent** mode or with a friend in **Co-Operative** mode. The **Leaderboards** option connects to Xbox Live and compares your performance in the mission modes with those of other players across the world in the online rankings.

**STARTING A SOLO MISSION**

Select Missions from the **Main Menu**, then select **Solo Agent** from the **Mission Mode** screen. The **Mission Select** menu follows. At this point, you must decide on a specific mission to take (new players always start with the Datacore mission), followed by the level of **Mission Difficulty**. You may only select a difficulty level equal to or lower than that of the previous mission.

Watch the **Mission Briefing** (or press A to skip), and then proceed to the **Mission Summary**.

From here you can begin the mission immediately or preface it with a visit to the **Armory**, should you want to customize your arsenal of weapons and gadgets.

**STARTING A CO-OP MISSION**

Select Missions from the **Main Menu**, and then select **Co-Operative** from the **Mission Mode** screen.

The next step is to choose how you want to work with your fellow operative. Opt for **Local** (split screen on a single Xbox 360™ console) or **System Link** (local area network) play, and you’ll continue to **Mission Select** and subsequent screens as described in **Starting a Solo Mission**. The player who initiates the game decides the level and difficulty.

Select **Xbox Live**, and you’ll use the Xbox Live online multiplayer functionality to find a suitable teammate before continuing to the **Mission Select** screen.

The **Armory** can only be accessed before a mission begins. Your default firearm is the P9P, but you can also opt to use weaponry brought back from previous missions.

Four slots are available for carrying weapons, but this doesn’t necessarily allow room for four separate items. For example, pistols take up a single slot while Sniper Rifles and Rocket Launchers are bulky enough to take up three apiece. Weapon slot rules apply to both **Solo Agent** and **Combat Arena** play.

Four slots are available for carrying weapons, but this doesn’t necessarily allow room for four separate items. For example, pistols take up a single slot while Sniper Rifles and Rocket Launchers are bulky enough to take up three apiece. Weapon slot rules apply to both **Solo Agent** and **Combat Arena** play.

You can also carry one gadget into a mission, which can be changed by visiting the **Armory**. Each gadget is context sensitive, features its own unique minigame and, depending on your initial choice, may well affect the routes and options open to you.

Defensively, body armor found during a mission will not affect your available weapon slots. Armor is indicated by a white outline around your health bar and reduces damage inflicted by enemy fire (with the obvious exception of armor-piercing rounds). Armored enemies within **Solo Agent** missions will be able to take more shots in the protected area. In **Combat Arena**, the effects of any type of armor are unified across the whole body.
**SCREEN LAYOUT**

<table>
<thead>
<tr>
<th>HEALTH BAR</th>
<th>Reduced when damage is taken. Shock damage from falls, gas, fires and some melee attacks will gradually be recovered. A white outline around the bar denotes armor.</th>
</tr>
</thead>
<tbody>
<tr>
<td>AMMO BAR</td>
<td>Represents ammunition held for your equipped weapon, both in the current clip and in total. To avoid being caught short in a firefight, manual reloading is something that should be done early and often.</td>
</tr>
<tr>
<td>WEAPON SWAP</td>
<td>Appears when you swap between weapons in your inventory, and when you try to pick up a new weapon with insufficient free slots. In this case, the new weapon and the one to be dropped in its place are both displayed.</td>
</tr>
<tr>
<td>ACTION INDICATOR</td>
<td>Shown when the environment allows a context-sensitive action. The button is always the same, the action differs depending on circumstances (opening a door, climbing a ladder, taking cover and so on).</td>
</tr>
<tr>
<td>RADAR</td>
<td>Applicable to Combat Arena only, except where a Solo agent carries a weapon with built-in radar. Each green blip indicates an ally, red denotes an enemy (appearing only when unsilenced weapons are fired). Triangular blips indicate enemies located on a higher or lower level.</td>
</tr>
</tbody>
</table>

**We’ve just changed your life**

Of course you’ve seen and heard it all before. A digital assistant that will take care of all your day-to-day hassles and organize your life. But this time we really mean it! Your d-PAL will store more information than you’ll ever accumulate in a hundred years and never drop a video link whether you’re in the Mexican jungle or just at Mother’s for lunch. All in a flexible card just .5mm thick. Life will never be the same.

- High resolution plasmaFlex screen
- Retinal neuroLink filament security system*
- PIMcom 2017 operating system with hiPad access or optional vocal link command
- Worldwide communications access with lowDrop video degradation**
- 3Tb on-card storage with central upload capability
- Online digital assistant help

* requires surgery at your local dataDyne facility
** requires optional bunnyLink earset
Default controls shown. To change your control method, select Options from the Main Menu.

Preferences established in the Xbox Guide may override individual game settings. If changes made through the Options menu do not take effect, check that there is no conflict with your Xbox Guide settings.
Jack Dark
DOB: 04/28/1969    BLOOD TYPE: A

Description: Following stints in the Marines and law enforcement, Jack Dark left the force under murky circumstances and set up a smalltime bounty-hunting operation to cover the rent. While curt, abrasive and domineering, Dark also has plenty of experience and the unflappable dependability essential in a good leader.

Joanna Dark
DOB: 03/20/2000    BLOOD TYPE: O

Description: Daughter of Jack Dark and a promising bounty hunter in training, Joanna Dark is keen, athletic, naturally sharp-witted and resourceful. However, she has yet to fully master her emotions and the mile-wide reckless streak they often trigger. Her father’s overprotective nature also causes friction.

Chandra
DOB: 11/21/1998    BLOOD TYPE: AB

Description: The mysterious Chandra completes the Dark Bail Bonds trio. Jack Dark first encountered the young hacker during his time on the Detroit police force, where they became unlikely allies. Chandra joined DBB upon its inception and has played the crucial role of Mission Coordinator from day one.
Agent should always make best use of their surroundings to get the upper hand. Good tactics include using the environment to gain the advantage in a firefight.

**TACTICAL MOVES**

**TAKING COVER**

The Action Indicator appears on-screen when you approach objects and environmental features that can be used for cover. Press A to take cover. Use 4 to look and aim around pillars (if applicable), and 8 to fire. Press A again when you're ready to break cover.

The exact control procedure for taking and breaking cover can be changed by accessing the Control Options subsection of the Main Menu.

**DODGING**

Use 4 together with 6 to perform combat dives and rolls. Enemies will find it much harder to get a bead on you if you're in constant motion. However, any shots that do hit home during a dive or roll will cause you more damage than usual.

**AIM MODE**

When more precise aiming is needed, hold down 7 as you move around. This activates Aim mode, making targeting easier at the expense of full movement speed.

A scope is also employed if one is fitted to your current weapon. In this case, a greater level of zoom becomes available depending on the pressure applied to 7 (press down fully for maximum zoom).

**DUAL WIELDING**

Some weapons, largely pistols and sub-machine guns, offer a dual wield capability if you acquire a matched pair. However, the added power of dual wielding is balanced by the loss of the Aim function, as A now fires the left-hand weapon instead.

Grenades and the combat shield can also be wielded alongside a pistol or SMG (although this disables secondary functions); simply cycle through your weapons until you reach them.

**PICKING UP WEAPONS**

If you come across a desirable weapon, simply walk over it to acquire it. Weapons identical to those you already have are automatically stripped of their ammo.

If you don't have enough free slots to carry the new weapon, you can make an exchange. Stand within reach of the fallen weapon, then press 3 to drop your current firearm and equip the new one.

**DROPPING WEAPONS**

Dropping a weapon usually occurs automatically when exchanging one firearm for another, but you can also discard one manually at any time by pressing 0. This is useful for bestowing a weapon on an unarmed and struggling teammate.

**CONCEALING WEAPONS**

You can choose to put away your weapon and go unarmed at any time, which sometimes makes more sense than brandishing a gun at anything that moves. What you carry also affects your movement speed. Press 5 to conceal a weapon.
**Disarming**

While unarmed (press ✧), press ✧ to make a grab for an opponent’s weapon. You must be positioned in front of an enemy (and have enough free weapon slots) for your disarm attempt to stand any chance of success.

**Controlled Falls**

You can drop from single-story heights with relative safety. The impact of landing will temporarily compromise your movement speed and incur minor shock damage, though this is quickly recovered. Falling from greater heights is a far more perilous exercise: don’t say we didn’t warn you.

**Turrets**

Turrets with heavy mounted weapons can be found at various points, both on land and on vehicles, such as the hovercraft. Turret-mounted weapons can be stolen or interchanged, though their main advantages—unlimited ammo and no reload time—apply only for as long as they remain mounted.

**Climbing Ladders**

The Action Indicator will appear on-screen when you approach a ladder. Press A to shoulder any weapons you may be carrying and get your foot on the rungs, and then tilt ✧ up or down to ascend or descend. Press and hold A to quickly slide down the ladder.

**Ziplines**

The Action Indicator also appears when you walk beneath ziplines. Press A to use the zipline; you will let go and drop to the ground automatically when you reach the end.

**ConversaTion**

Should you come across an obviously unarmed character during a mission, you may be best served by concealing your weapon and using the art of conversation to make progress. If your target’s willing to talk, three options are available—bluff, threaten and charm (selected by ✧ directions). The standard rule is that you should bluff people who appear confused, threaten those who strike you as nervous and charm anyone who seems friendly. Successful interaction can only help your mission, while failure will almost certainly hinder it.

**TaufTs**

During crucial battles, you may find that your opponents like to taunt you as they fight. You can turn this situation around and gain a temporary advantage by issuing a razor-sharp comeback. Following an enemy taunt, a ✧ direction will appear on-screen; press the correct direction quickly to retort, distracting or angering the enemy and providing an opportunity to deal some damage.
**PISTOLS**

**PISTOL (DUAL WIELD)**
CAPACITY: 9 ROUNDS  
SECONDARY FUNCTION: SILENCER  
TERTIARY FUNCTION: FLASHLIGHT
Highly customizable with scope fitted as standard. Secondary function attaches a silencer for stealth kills, while the tertiary function switches on a flashlight for use in low light conditions.

**FALCON (DUAL WIELD)**
CAPACITY: 18 ROUNDS  
SECONDARY FUNCTION: FIRECRACKER
A relatively underpowered but accurate weapon, favored by professionals for its high rate of fire. Secondary function allows a full clip to be thrown down, firing each round in sequence to distract enemies.

**MACMUN (DUAL WIELD)**
CAPACITY: 6 ROUNDS  
SECONDARY FUNCTION: DECOY FIRE
One for those who appreciate true stopping power; this intimidating six-shooter can teach a painful lesson in muzzle velocity. Secondary function fires a silenced decoy shot with delayed detonation.

**MACSELH (DUAL WIELD)**
CAPACITY: 9 ROUNDS  
SECONDARY FUNCTION: REBOUND FIRE
State-of-the-art military pistol ideal for engaging targets at a distance. Secondary function magnetizes the rounds, exaggerating ricochet and allowing skilled users to effectively fire around corners.

**HEAVY WEAPONS**

**M60**
CAPACITY: 80 ROUNDS  
SECONDARY FUNCTION: CALTROPS (USES 3 ROUNDS)
This belt-fed beauty lays down a field of suppressive fire that renders its inaccuracy negligible. Secondary function dispenses caltrops to slow down personnel and stop most vehicles in their tracks.

**PLASMA RIFLE**
CAPACITY: 40 SHOTS  
SECONDARY FUNCTION: CLOAK
Fires explosive bolts of super-heated plasma. Secondary function diverts energy to cloak the firer. A self-recharging power core provides limitless ammunition but the charge is quickly exhausted, especially by cloaking (moving while cloaked drains power faster still).

**ROCKET LAUNCHER**
CAPACITY: 4 ROCKETS  
SECONDARY FUNCTION: FLY-BY-WIRE
Destructive enough with a standard warhead, but the secondary function enables fly-by-wire rockets that can be guided straight to their destination from the flip-out target finder—provided they strike before running out of fuel.

**PSYCHOSIS GUN (DUAL WIELD)**
CAPACITY: 6 ROUNDS  
SECONDARY FUNCTION: PSYCHOSIS
Compact tranquilizer pistol used by bail enforcement agents. Adapted to fire a concentrated dose which negates the target’s distinction between friends and enemies, resulting in serious collateral damage.

To access secondary functions, press and release R. To access tertiary functions, hold down R and press L.
SUB-MACHINE GUNS

DW-PSI
CAPACITY: 24 ROUNDS
SECONDARY FUNCTION: SILENCER
TERTIARY FUNCTION: FLASHLIGHT
The DW-PSI comes with a built-in scope and is easily modified. Secondary function attaches a silencer for recon missions, while the tertiary function switches on a flashlight for use in low light conditions.

UGL LIBERATOR (DUAL WIELD)
CAPACITY: 24 ROUNDS
SECONDARY FUNCTION: BOOBY TRAP
Powerful but inaccurate weapon favored by the "spray and pray" school. Secondary function throws down the weapon, activating an internal explosive device that detonates when its perimeter is broken.

CMP 150 (DUAL WIELD)
CAPACITY: 24 ROUNDS
SECONDARY FUNCTION: HOLOGRAM
Accurate and fast-firing, the CMP can absolutely shred enemies at close range. Secondary function activates an advanced built-in hologram projector to lure and confuse enemies.

RCP-80
CAPACITY: 40 ROUNDS
SECONDARY FUNCTION: THREAT DETECTOR
TERTIARY FUNCTION: REPROGRAM
Boasts a stunning rate of fire, plus invaluable additional functions. Secondary function pinpoints and enhances enemy threats; tertiary function reprograms electronic hazards (aim and press A) such as sentry guns, mines and security cameras.

ASSAULT RIFLES

KSI-74
CAPACITY: 30 ROUNDS / 1 BAYONET SHOT
SECONDARY FUNCTION: BAYONET SHOT
A rugged and powerful assault rifle, highly effective when fired in short bursts. Secondary function employs a bayonet for silent takedowns.

FAC-16
CAPACITY: 30 ROUNDS / 2 SHOT GRENADES
SECONDARY FUNCTION: GRENADE
TERTIARY FUNCTION: SILENCER
A precise and adaptable military rifle with standard-issue scope. Secondary function grenades detonate on impact with any surface, while the tertiary function affixes a silencer for stealth kills.

SUPERDRAGON
CAPACITY: 20 ROUNDS / 6 SHOT GRENADES
SECONDARY FUNCTION: BOUNCE GRENADES
TERTIARY FUNCTION: NIGHTVISION
A versatile infantry weapon with built-in scope. Secondary function switches to the underslung grenade launcher which, with practice, can be used to bounce grenades off walls and ceilings to devastating effect.

LAPTOP
CAPACITY: 30 ROUNDS
SECONDARY FUNCTION: SENTRY GUN
Compact and deadly, with a fearsome rate of fire. Secondary function transforms it into an autonomous sentry gun, making it ideal for covert agents who need a laptop PC in the field. Runs Windows 2020.

SUB-MACHINE GUNS

DW-PSI
CAPACITY: 24 ROUNDS
SECONDARY FUNCTION: SILENCER
TERTIARY FUNCTION: FLASHLIGHT
The DW-PSI comes with a built-in scope and is easily modified. Secondary function attaches a silencer for recon missions, while the tertiary function switches on a flashlight for use in low light conditions.

### Close Combat

**VIBLASE**
- **Maximum Slash Radius**: 2 Meters
- **Secondary Function**: Deflect

A resonating-edge blade of unknown origin and a chilling weapon in trained hands. Secondary function throws up an impenetrable wall capable of deflecting bullets right back at the aggressor.

### Thrown

**FRAG GRENADE (DUAL WIELD)**
- **Blast Radius**: 5 Meters
- **Secondary Function**: Dual Wield

High-explosive fragmentation device with a four-second fuse, which becomes an impact grenade if held until the timer reaches zero. Secondary function allows grenades to be carried alongside a dual wield pistol or SMG.

**MULTIMINE**
- **Blast Radius**: 2 Meters
- **Secondary Function**: Remote Control

A powerful deterrent to pursuers. Can be deployed as a proximity mine to detonate when enemies approach. Secondary function can be used to lay lethal trails of mines that explode when triggered.

**HAWK**
- **Chance of Survival (Unarmored)**: None
- **Secondary Function**: Shrapnel Shield

An experimental oddity with a tungsten alloy blade (use \( \sum \) to lock on to enemies). The Hawk uses miniaturized anti-gravity to extend flight time and power its secondary function, a force field that defends against grenades and rockets.

**FLASHBANG (DUAL WIELD)**
- **Effective Radius**: 50 Meters
- **Secondary Function**: Dual Wield

Explodes with a blinding light and deafening noise to disorient enemies, allowing for quick follow-up attacks. Effects are indiscriminate, so be sure to look away. Secondary function allows dual wielding alongside a pistol or SMG.

**CLOSE COMBAT**

**VIBLASE**
- **Maximum Slash Radius**: 2 Meters
- **Secondary Function**: Deflect

A resonating-edge blade of unknown origin and a chilling weapon in trained hands. Secondary function throws up an impenetrable wall capable of deflecting bullets right back at the aggressor.

**DEF-1 SHOTGUN**
- **Capacity**: 6 Rounds
- **Secondary Function**: Radar Sweep
- **Tertiary Function**: Mimic

Hard-hitting weapon of choice for tight urban environments. Standard electronics protect the carrier and nearby allies from enemy radar sweeps. Secondary function highlights all local targets but also exposes the carrier; tertiary mode tricks enemy radar into registering you as an ally.

**COMBAT SHIELD (DUAL WIELD)**
- **PolyCarbonate Thickness**: 0.250”

Guarantees 100 percent safety from melee attacks and limited protection from small-arms fire. Hold \( \sum \) to raise it to head height. Clear panels allow combat awareness to be maintained when equipped alongside a weapon.

**CLOSE COMBAT**

**VIBLASE**
- **Maximum Slash Radius**: 2 Meters
- **Secondary Function**: Deflect

A resonating-edge blade of unknown origin and a chilling weapon in trained hands. Secondary function throws up an impenetrable wall capable of deflecting bullets right back at the aggressor.

**DEF-1 SHOTGUN**
- **Capacity**: 6 Rounds
- **Secondary Function**: Radar Sweep
- **Tertiary Function**: Mimic

Hard-hitting weapon of choice for tight urban environments. Standard electronics protect the carrier and nearby allies from enemy radar sweeps. Secondary function highlights all local targets but also exposes the carrier; tertiary mode tricks enemy radar into registering you as an ally.

**COMBAT SHIELD (DUAL WIELD)**
- **PolyCarbonate Thickness**: 0.250”

Guarantees 100 percent safety from melee attacks and limited protection from small-arms fire. Hold \( \sum \) to raise it to head height. Clear panels allow combat awareness to be maintained when equipped alongside a weapon.
**DATATHIEF**

The essential tool for hacking computer terminals and electronically activated doors. High-tech superspies don’t leave home without it.

Initiator: Clear all rings of Intrusion Countermeasure Electronics (ICE), represented as blue blocks, by pressing as the cursor passes over them. Hitting one red or two white blocks will push you back a ring.

**LOCKTOPUS**

A quirky lock-picker for those doors still made in the old-fashioned style. No spring or tumbler is a match for this mechanical marvel.

Initiator: Use to find the “sweet spot” of each pin. The controller rumbles (if enabled), and the center circle changes color, then shrinks, to indicate progress. A green indicator marks a completed pin.

**DEMO KIT**

Found a wall that needs blowing open? Leave any semblance of subtlety at the door, and take this explosive accessory instead.

Initiator: Join the two contacts by rotating squares to form a complete circuit. Use to select a piece and to rotate it. Each square changes color as the charge travels through it.

---

**GADGETS**

While other gadgets may become available at various points—such as the Revive Kit (used to resuscitate fallen allies in Co-Op and DarkOps), CamSpy (remote drone with tracker or explosive payload) and Audioscope (recon tech with voice analyzer)—the following three will provide the most overall use.

The success rate of each depends on your skill at clearing its security procedure, known as the initiator. Press to abandon an initiator sequence at any time.
Multiplayer battles in the Combat Arena fall under two general banners: DeathMatch and DarkOps. Entrance to either of these modes is gained by selecting Combat Arena from the Main Menu.

When this option is activated, you must choose an appropriate connection mode. There are three types: Local, System Link and Xbox Live.

**LOCAL**

Compete on a single machine, either solo vs. bots or in split-screen play with up to three other players (battling against each other or bots).

**SYSTEM LINK**

Play against other machines on a local area network. Four-way split-screen play is also possible here.

**XBOX LIVE**

Play anyone and everyone, anytime, anywhere on Xbox Live. Build your profile (your gamer card). Chat with your friends. Download content at Xbox Live Marketplace. Send and receive voice and video messages. Get connected, and join the revolution.

**CONNECTING**

Before you can use Xbox Live, connect your Xbox console to a high-speed Internet connection and sign up to become an Xbox Live member. For more information about connecting, and to determine whether Xbox Live is available in your region, go to www.xbox.com/live.

**FAMILY SETTINGS**

These easy and flexible tools enable parents and caregivers to decide the games young players can access based on the content rating. For more information, go to www.xbox.com/familysettings.

---

**VEHICLES**

- **JETPAC**
  - Top Speed: 80 kph
  - State-of-the-art personal flight device (PFD) with walk mode fitted as standard
  - Twin machine guns and hover capability for firing in place or on the go
  - Accelerate, brake, strafe left/right
  - Turn left/right, look up/down
  - Take off/land (when near ground)
  - Rise (release to fall, hold to hover)
  - Mount/dismount

- **HOVERCRAFT**
  - Top Speed: 100 kph
  - Pilot and gunner positions with passenger room at sides (pilot’s responsibility)
  - Turret for three interchangeable heavy weapons: M60, Plasma Rifle or Rocket Launcher
**Quick DeathMatch**

This is the fastest and least complicated method of reaching a DeathMatch lobby. The route to the lobby is based on several criteria, including connection speed.

**Quick DarkOps**

Similar to the Quick DeathMatch option, this offers quick and easy access to a DarkOps lobby.

**Custom Match**

Using Custom Match returns a list of potential lobbies, which can be manually browsed and selected. The search can be narrowed by changing any of the options on the Custom Match search page.

**Split Screen**

To bring another player into the game, press START on a spare controller. Up to four players can engage in split-screen play. Players are given a default profile but are also able to select a guest profile from the Xbox Guide if preferred.

**Ranked vs. Unranked**

Lifetime stats are only tracked in ranked games, which have fewer setup options open to change. In unranked games, any setup can be played.

**Leaderboards**

This option allows you to compare your performance and your hard-earned stats against those of other sharpshooters worldwide. Don’t worry if there always seems to be someone better than you, as enough training can make anyone a world-class combatant.

**Teams**

Each team is represented by characters taken from the single-player game and grouped into identities. The game owner chooses which two teams will play against each other. Teams cannot have the same identity.
DeathMatch is a creation of dataDyne Corp. Players compete in virtual arenas using any of several different groups of weapons. The mainstream game has swept around the globe, and the top-ranked DeathMatch players are feted as celebrities. Away from the rigid structure of the ranked matches, anything goes; some players even spice up the gameplay with bots...

**DEATHMATCH**

**KILLCOUNT**
A free-for-all match. The winner is the player who racks up the most kills.

**TEAM KILLCOUNT**
A team-only match. The winning team is the one that achieves the most collective kills.

**CAPTURE THE FLAG**
A team-only match. Each team tries to grab the flag from the enemy base and return with it to their own base, thereby capturing it. The team with the most successful captures is declared the winner.

**TERRITORIAL GAINS**
A team-only match. Teams try to capture several neutral hills and retain control of them until they generate points. The team that seizes and holds the most territories is the winner.

DarkOps is a round-based multiplayer game. It is a slower-paced and more tactical game than DeathMatch. Each round, players must buy weapons from their personal stock of cash, earned through killing the enemy and achieving scenario objectives.

**DARKOPS**

**ERADICATION**
A team-only game. The last team with any members left alive wins.

**ONSLAUGHT**
A team-only game. One team defends a base, gets one life each and can buy weapons as normal. All other teams have only basic weapons but infinite lives. The team that stays alive longest while defending the base wins.

**INFECTION**
A free-for-all game. There are two factions of players: infected and uninfected. Most players start off uninfected. After a player dies, he/she becomes a member of the infected. If the uninfected stay alive until the end of the match, they are the only players to get points. If the infected wipe them out, they are the only ones to score. The player with the most points is the overall winner.

**SABOTAGE**
A team-only game. Targeted destruction—the team that ultimately causes the most damage to the other team’s property wins.
The basic options for game customization encompass such factors as weapon sets, level variants and game duration. The permitted limits are different for ranked and unranked games, with ranked games being more restrictive.

When customizing the game setup, bear in mind that the defaults vary from level to level for a reason—they have been set up to offer the sharpest and most satisfying combat experience. Defaults can still be altered by any player with a specific scenario in mind (or a simple old-fashioned curious streak). But remember, one particular setting will not necessarily provide the same experience on each level.

Customization

**BASIC**

The basic options for game customization encompass such factors as weapon sets, level variants and game duration. The permitted limits are different for ranked and unranked games, with ranked games being more restrictive.

When customizing the game setup, bear in mind that the defaults vary from level to level for a reason—they have been set up to offer the sharpest and most satisfying combat experience. Defaults can still be altered by any player with a specific scenario in mind (or a simple old-fashioned curious streak). But remember, one particular setting will not necessarily provide the same experience on each level.

Advanced

Advanced options are more likely to apply to unranked games. They offer combatants the ability to specify at which a team spawns, whether bots are involved in play, the disabling of cheap or controversial weapons plus the amount of money each player is given to buy them (DarkOps only), and so on.

When you have some familiarity with **Combat Arena**, these options limit you the freedom to tailor the full battlefield experience to your own personal tastes, however humble or demanding.

**ENDNOTE**

The time for education has passed. Mental preparation can only take you so far. The phenomenon that is DeathMatch cannot be fully encapsulated by mere words—it must be experienced. Your physical training begins the minute you close this guidebook and step into our game world. Thank you for choosing dataDyne.

Additional Thanks

**CUSTOMIZATION**
LIMITED WARRANTY FOR YOUR COPY OF XBOX GAME SOFTWARE ("GAME") ACQUIRED IN THE UNITED STATES OR CANADA

WARRANTY

Microsoft Corporation ("Microsoft") warrants to you, the original purchaser of the Game, that this Game will perform substantially as described in the accompanying manual for a period of 90 days from the date of first purchase. If you discover a problem with the Game covered by this warranty within the 90-day period, your retailer will repair or replace the Game at its option, free of charge, according to the process identified below. This limited warranty: (a) does not apply if the Game is used in a business or for a commercial purpose, and (b) is void if any difficulties with the Game are related to accident, abuse, virus or misapplication.

RETURNS WITHIN 90-DAY PERIOD

Warranty claims should be made to your retailer. Return the Game to your retailer along with a copy of the original sales receipt and an explanation of the difficulty you are experiencing with the Game. At its option, the retailer will either repair or replace the Game. Any replacement Game will be warranted for the remainder of the original warranty period or 30 days from receipt, whichever is longer. If for any reason the Game cannot be repaired or replaced, you will be entitled to receive your direct (but no other) damages incurred in reasonable reliance but only up to the amount of the price you paid for the Game. The foregoing (repair, replacement or limited damages) is your exclusive remedy.

LIMITATIONS

This limited warranty is in place of all other express or statutory warranties, conditions or duties and no others of any nature are made or shall be binding on Microsoft, its retailers or suppliers. Any implied warranties applicable to this Game or the media in which it is contained are limited to the 90-day period described above. TO THE FULL EXTENT ALLOWED BY LAW, NEITHER MICROSOFT, ITS RETAILERS OR SUPPLIERS ARE LIABLE FOR ANY SPECIAL, INCIDENTAL, PUNITIVE, INDIRECT OR CONSEQUENTIAL DAMAGES ARISING FROM THE POSSESSION, USE OR MALFUNCTION OF THIS GAME. THE FOREGOING APPLIES EVEN IF ANY REMEDY FAILS OF ITS ESSENTIAL PURPOSE. Some states/jurisdictions do not allow limitations as to how long an implied warranty lasts and/or exclusions or limitations of incidental or consequential damages so the above limitations and/or exclusions of liability may not apply to you. This limited warranty gives you specific rights, and you may also have other rights that vary from state/jurisdiction to state/jurisdiction.
